Vocational mobility in Europe

Boost international vocational skills
and competences in
trustful European partnerships

EREIVET – 15 partners from 12 European countries and regions foster quality in mobility

EREIVET – Quality in mobility How to plan, organise and evaluate a mobility project for VET learners and staff

Our objective

We facilitate the acquisition and the use of international knowledge, skills and qualifications for personal development, employability and participation in the European labour market.

We are cooperating to develop a common strategy to enhance the quality and quantity of learning mobilities. We support teachers, trainers and stakeholders in

- building trustful partnerships
- implementing Europass instruments for transparency in classrooms and companies
- identifying learning outcomes for the branches: business, administration and services, electricians, social and health care
- following the ECVET-process

Based on the longstanding mobility experience of our partners in Europe this flyer gives you an example of the concept and organization of a learning mobility that leads to an added value for the individual as well as his company and training institution.

Target group:

Teachers, trainers, students, apprentices, stakeholders, who want to acquire international vocational competences
